

# NAICS CODES OF ENVIRONMENTALLY SENSITIVE INDUSTRIES

**"Records Search with Risk Assessment"** means and includes (1) a search of the government databases identified in 40 CFR § 312.26 for an AAI compliant Phase I as well as a search of historical use records (for example, aerial photography, city directories, reverse directories and/or fire insurance maps) pertaining to the Property and Adjoining Properties; and (2) a risk assessment by an Environmental Professional based on the results of the records search as to whether the Property is either "low risk" or "elevated risk" or "high risk" for Contamination.

A **Phase I** should always be obtained if the business sells, supplies or dispenses fuel, gasoline, heating oil, even if the NAICS code for the business is not identified on this list of environmentally sensitive industries.
